

IN THE SPECIFICATION:

Please add the drawing submitted herewith to the specification.

Please add the heading and following paragraph at page 8 after line 5 and prior to line 11.

Brief Description of the Drawing

Figure 1: A DSC (Differential Scanning Calorimetry) thermogram of normal brown hair. The hair sample was heated from 25°C to 300°C at a heating rate of 20°C/min. Peak A is the water release peak. Doublet peak B corresponds to the melting or rearrangement of the α -structure and its matrix contribution.

REMARKS

Figure 1 has been submitted herewith. Support for Figure 1 can be found, for example, at page 10 lines 9-16 of the specification as filed (describing the nature of the thermogram and of both peaks observed therein), at page 10, line 17 through page 12, line 9 (describing DSC, the utility of DSC, the experimental procedure, and the scientific theory behind DSC), at page 12, line 10 through page 13, line 11 (explaining the thermogram in Figure 1). Thus, the specification specifically describes the results depicted in the figure and how one of ordinary skill in the art can obtain the results presented in the figure, *i.e.*, how to make the product tested and how to test the product. Thus, the figure is already inherently described and is not new matter.

Additionally, the Brief Description of the Drawing has been added, after having been deleted in the previous Amendment. Support for this passage can be found in the application as filed.
